

LevelUp: Build a Landing Page for charity: water (50pts Extra Credit)

Start Milestone

- Due Jun 4 by 11:59p.m.
- Points 0
- Submitting a file upload
- File Types pdf
- Available until Jun 6 at 11:59p.m.

Project | Build the charity: water Landing Page

charity: water

As a Digital Marketing Associate last week, you designed a landing page for charity: water aimed at connecting with college students and inspiring them to take action on the global water crisis. Now it's time to bring that design to life, and use coding to make your landing page design into a real website!

INTRODUCTION

In this Project, you'll transform your Canva mockup into a fully functional landing page using HTML and CSS. This is your chance to take your creative concept — with your brand visuals, your messaging, and your imagery — and make it real. You'll build a site that not only looks great, but also educates, inspires, and drives action.

With help from AI to jumpstart your layout, you'll focus on structuring your content, applying your brand style, and creating a polished final product that reflects your vision. By the end of this Project, you'll have a live, interactive page deployed to the web. You can share this work when you want to showcase your technical skills and your passion

for digital storytelling.

YOUR TASK

1. Click this starter file link  (<https://github.com/PE-Classroom/CR-02-charity-water-lp/codespaces>) to launch your own Codespace.

2. Use AI to Jumpstart Your Layout: Prompt a Gen AI tool like ChatGPT to help you generate the initial HTML and CSS structure based on your Canva mockup. You can even provide the tool with an image of your landing page and ask it to analyze the mockup and generate HTML and CSS code appropriate for beginners based on what it sees (note that the free version of ChatGPT allows users to upload up to 3 files per day).

- Specify the coding language you want the AI to generate. If it uses something that's not HTML or CSS or is too advanced for your current skill level, you will have a hard time reading and modifying the code!
- Include details like your headline, layout sections (hero, story, CTA), and brand style.
- This is just your starting point — the real work is in building on top of the initial AI output.

3. Add content and design

- Focus on getting your content and visuals into place. Add your headline, imagery, story, and CTA.
- Replace any placeholder images in your code with the images you chose (this will require uploading files into your Codespace's 'img' folder).
- Apply your brand palette and typography choices from Canva so the page reflects your original concept (improving on your choices from last week is allowed, just make sure the 'look and feel' meets the brand guidelines!).

4. Iterate and Elevate Your Work: Go beyond the AI's suggestions. Draw attention to

your headline, make your call-to-action stand out clearly, and use contrast and spacing to guide the viewer's eye through the page.

- Make your page responsive so it works well across different screen sizes (AI can help!).
- Experiment with CSS transition and transform effects to enhance the user experience.

5. Commit and Push your project changes to GitHub from Codespaces to prevent losing progress.

6. Deploy Your Page using GitHub Pages. Grab the link for submission. Make sure to share your **Github pages link** and NOT a link to your repository or Codespace. As mentioned on the previous page, the CORRECT kind of link should look like this: **`https://username.github.io/your-repo-name`**.

NEED SOME EXTRA GUIDANCE?

- Check out this help article for **Common GitHub Issues** (<https://helphub.hq.globaltech.org/en/articles/11089726-common-github-issues-and-errors>)
- Check out **how to navigate Github here** (https://hq.globaltech.org/courses/10847/pages/set-up-your-coding-environment-15-mins?module_item_id=111962) (demo videos)

WHAT YOU'LL SUBMIT

Once your website is ready to go, reflect on your experience and prepare for job interviews and professional networking by answering a few short reflection questions. Download the doc below to share your website's URL in the indicated spot. We can't wait to see what you can do!

Add This to Your Resume!

Developed a fully branded landing page for a non-profit using AI coding assistance, HTML and CSS **(add the link!)**.

Landing Page Build - Evaluation Rubric

Criteria	Ratings			Pts
Campaign Page Execution	10 pts Full Extra Credit Includes all required content (headline, story, CTA, imagery) and organizes it into a clean, logical layout based on the original Canva concept.	5 pts Partial Points Most content is included, but layout is inconsistent or unclear.	0 pts No Points Major content missing or layout is broken/disorganized.	10 pts
Styling & Branding Consistency	10 pts Full Extra Credit Color palette, typography, and visual style match the Canva mockup and support the campaign's tone.	5 pts Partial Points Some branding elements are present, but usage is inconsistent or underdeveloped.	0 pts No Points No clear branding; visual choices feel generic or disconnected.	10 pts
Built on Top of AI Output	10 pts Full Extra Credit Page shows clear customization beyond AI starter code — layout, content, and styling have been refined.	5 pts Partial Points AI output is used with only minor edits; structure feels default	0 pts No Points Page appears copy-pasted from AI with minimal changes	10 pts
Deployment	5 pts Full Extra Credit Website is live on GitHub Pages and an accessible link is provided.		0 pts No Points No attempt to deploy	5 pts
Reflection: Building Websites with AI	5 pts Full Extra Credit Made an effort to answer the reflection question.	2 pts Partial Points Answered the reflection question, but the answer was off-topic, extremely short, or otherwise indicative of a lack of genuine effort	0 pts No Points No attempt at answering the reflection question.	5 pts

Criteria	Ratings			Pts
Reflection: Interview Question	5 pts Full Extra Credit Made an effort to answer the reflection question.	2 pts Partial Points Answered the reflection question, but the answer was off-topic, extremely short, or otherwise indicative of a lack of genuine effort	0 pts No Points No attempt at answering the reflection question.	5 pts
Reflection: LinkedIn Post	5 pts Full Extra Credit Made an effort to answer the reflection question.	2 pts Partial Points Answered the reflection question, but the answer was off-topic, extremely short, or otherwise indicative of a lack of genuine effort	0 pts No Points No attempt at answering the reflection question.	5 pts
