Brand Visuals – Photography

I chose flowing water, a kid catching water in his hands, and a video of the drilling process of the water to illustrate that the donations and private funding is the reason the process of drilling and providing water to water deserts has an impact.

- Addressing the issue of water deserts and enabling access to water, allows for the communities to avoid commonly treatable diseases, and illnesses.
- Frees up the youth and females in impoverished communities, to pursue education and other opportunities.
